BODY CARDIO - VASCULAR AGE

INDUSTRY PREMIERE

A new heart health biomarker is now available on your Body Cardio.

Every weigh-in now gives you more insights on your cardiovascular health. With Vascular Age, get a clearer picture of the age of your arteries— and know how old you are on the inside.

BODY CARDIO - VASCULAR AGE

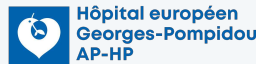

Vascular Age is a key health biomarker used by the medical community to assess cardiovascular health.

— Dr Stéphane Laurent, professor emeritus of pharmacology at Paris Descartes University

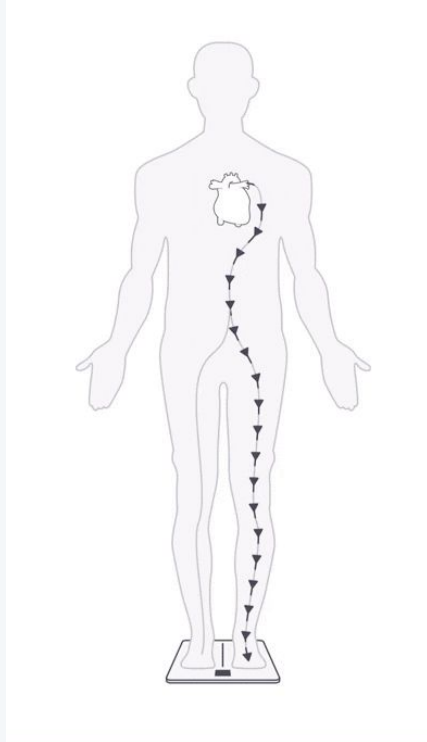

A CARDIO CHECK-UP. AT EVERY WEIGH-IN.

Developed with cardiologists and included in several validation studies with renowned hospitals in the EU & in the US.

Body Cardio is the first smart scale to provide a cardiovascular check-up in less than 30 seconds, simply from the comfort of your home.

BODY CARDIO - VASCULAR AGE

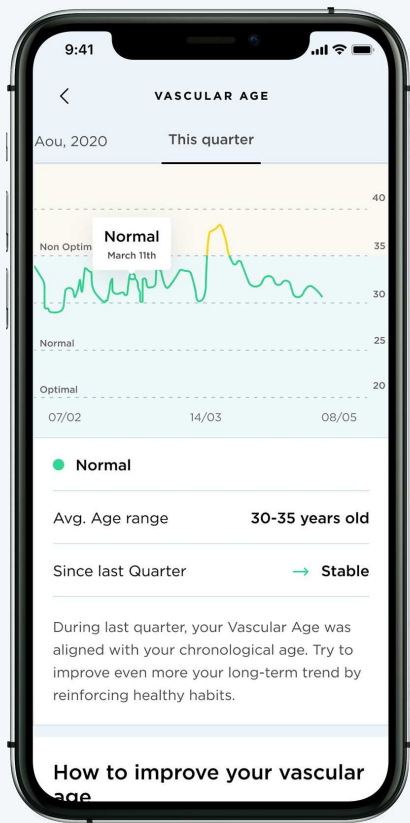

BASED ON PULSE WAVE VELOCITY

Introduced in 2016 and with over 80 million readings, Withings has one of the largest PWV databases in the world.

To determine Vascular Age, Withings' algorithm analyses a persons' PWV measurement against the norms for their age and physical characteristics.

BODY CARDIO - VASCULAR AGE

A CARDIO CHECK-UP. AT EVERY WEIGH-IN.

The scale will conveniently show a person, on its screen, if they are:

- optimal
- normal
- non optimal

The Withings Health Mate app will show additional information including an estimation of their vascular age as well as exercise and nutrition advice to improve cardiovascular health.
