**Extinguishing media****Suitable extinguishing agents**

Use extinguishing agent suitable for local conditions and the surrounding environment . Such as dry powder , CO<sub>2</sub>.

**Special hazards arising from the substance or mixture**

Battery may burst and release hazardous decomposition products when exposed to a fire situation. Lithium ion batteries contain flammable electrolyte that may vent, ignite and produce sparks when subjected to high temperature (>150°C(302T)), when damaged or abused (e.g. mechanical damage or electrical overcharging); may burn rapidly with flare-burning effect; may ignite other batteries in clothes proximity

**Advice for firefighters**

**Protective equipment:** Wear self-contained respirator. Wear fully protective impervious suit.

**Personal precautions, protective equipment and emergency procedures**

Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation.

**Environmental precautions**

Do not allow material to be released to the environment without proper governmental permits.

**Steps to be taken in case material is spilled or released**

Remove ignition sources, evacuate area. Sweep up using a method that does not generate dust. Collect as much of the spilled material as possible, placed the spilled material into a suitable disposal container. Keep spilled material out of sewers, ditches and bodies of water.

**Waste disposal method**

All waste must refer to the United Nations, the national and local regulations for disposal.

**Reference to other sections**
